## ADVANCED "DIASTOLIC DYSFUNCTION & MEASUREMENTS MADE EASY" - POCUS CARDIAC

This one day workshop will provide comprehensive insight into LV diastology & common measurements used at the bedside. Providing the delegate with the skill of integration of echocardiography information for clinical decision making.

Learning outcomes: Describe diastolic function & dysfunction (grading) using Doppler hemodynamic's & LA volume.

Understand theory & application of left & right heart systolic function: Assess valvular function using doppler hemodynamic's.

Application of measurements include; RVSP, FAC, C.O, SV, C.I, AVA, TAPSE, RV Sm, PAT, mPAP, LA volume, EF, DPI & more.

An integrated format designed combining, pre-reading, mini lectures (Guest speaker Dr Mark Rugless POCUS-Diastolic) & practical (emphasis) will be utilized.
