

**ONE DAY WORKSHOP**

# ADVANCED “DIASTOLIC DYSFUNCTION & MEASUREMENTS MADE EASY” - POCUS CARDIAC

10%

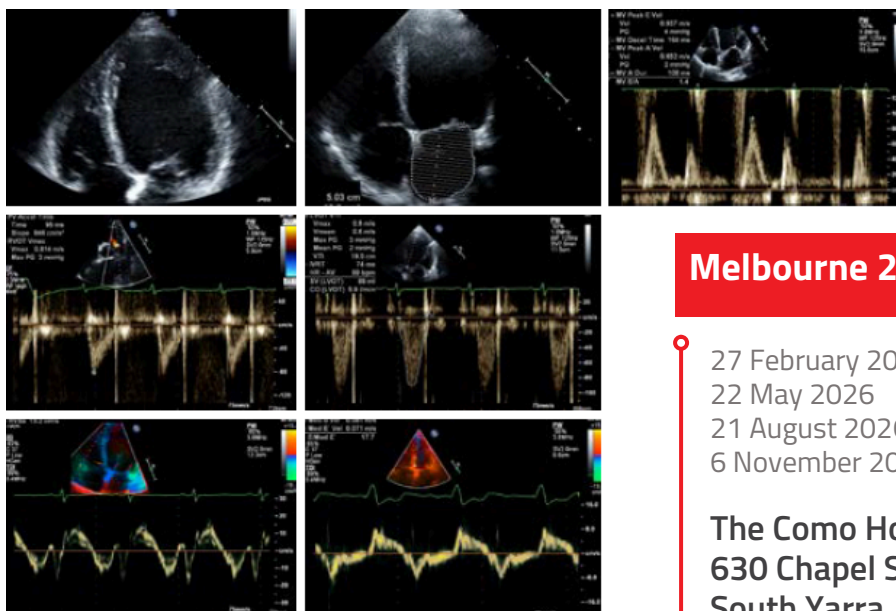

Discount for  
Junior Doctors

This one day workshop will provide comprehensive insight into LV diastology & common measurements used at the bedside. Providing the delegate with the skill of integration of echocardiography information for clinical decision making.

**An integrated format, combining:**  
*Pre-reading, Practical emphasis and Mini lectures Guest speaker - Dr Mark Rugless POCUS-Diastolic*

## Learning Outcomes:

- Describe diastolic function & dysfunction (grading) using Doppler haemodynamic's & LA volume (NEW 2025 guidelines)
- Perform required measurements to determine grading of diastolic dysfunction.
- Understand theory & application of left & right heart systolic function: Assess valvular function using doppler haemodynamic's
- Application of measurements include: Mitral valve inflow velocities; Lateral and Medial DTI e'; TR V max; LA Volume; Pulmonary S and D waves; IVRT; PVAT; mPAP; along with optional extra measurements of LVOT VTI, EF, TAPSE, C.O, SV & more.
